

ACCESS

ADSL Multi-Site Local

Many ISPs offer the standard range of capped and uncapped ADSL services, usually only with the end user in mind. However, if you are an administrator who is in charge of managing the local Internet access for all your branches or users, you'll need far more than this.

MWEB Business's **ADSL Multi-Site Local** product enables you to manage, track and cap various ADSL accounts, all of which are collated into a single invoice at the end of the month.

The difference between ADSL Multi-Site local and our standard Multi-Site product is that this is specifically designed for businesses that communicate primarily through a VPN or do not require international Internet connectivity.

Through ADSL Multi-Site, MWEB Business provides you with the ability to:

- Provision your own ADSL user accounts.
- Set cap restrictions per user account as you prefer.
- Receive a daily report of all usage consumed per user.
- Receive a single monthly bill for all usage consumed.

How does ADSL Multi-Site work?

MWEB Business has created a secure online interface for you to manage your ADSL user accounts directly via the MWEB Business ADSL infrastructure.

This allows you to create user accounts and specify individual monthly usage caps per user account as necessary. You can also specify the names and email addresses of the user accounts so that each person receives their own daily usage reports. This helps users to monitor and control their own data consumption throughout the course of the month.

There are a number of Multi-Site Local packages, starting at 20Gb minimum, 40Gb, 60Gb, 100Gb, 150Gb and 200Gb. With all of them, you have unrestricted local bandwidth until you reach your pre-selected data cap.

How much does it cost?

| Services | Setup (Incl VAT) | Monthly (Incl VAT) |
|--------------------------------------|------------------|--------------------|
| ADSL Multi-Site 20GB Minimum | n/a | R300 |
| ADSL Multi-Site 40GB Minimum | n/a | R600 |
| ADSL Multi-Site 60GB Minimum | n/a | R900 |
| ADSL Multi-Site 100GB Minimum | n/a | R1 500 |
| ADSL Multi-Site 150GB Minimum | n/a | R2 250 |
| ADSL Multi-Site 200GB Minimum | n/a | R3 000 |

| Rates (for any additional usage consumed) | |
|---|------------|
| Per GB | R20 |
