Safeshop

Payment Gateway Professional offers e-Commerce merchants operating their own Shopping Cart, Check-Out and Order Management service within their Web Site, the ability to pass transactions directly across to a Payment Gateway service.

This direct connection offers merchants the ability to connect to an Acquiring Bank of their choice via the SafeShop platform. Payment Gateway Professional also offers merchants reporting functionality, which addresses reporting on Successful and Failed transactions, as well as log files that address hour-to-hour, day-to-day, or month-to-month transaction volumes.

Merchants that have used an advanced skill set like PHP, Perl, XML, etc to develop their e-Commerce Web Site, will find this product suitable for their direct payment gateway requirements. This service supports payment methods such as: Credit Cards, Alternative Payment Methods, Direct Deposits and Cash on Delivery.
